

P10 (51 years old) : germline mutations (VAF>3%)

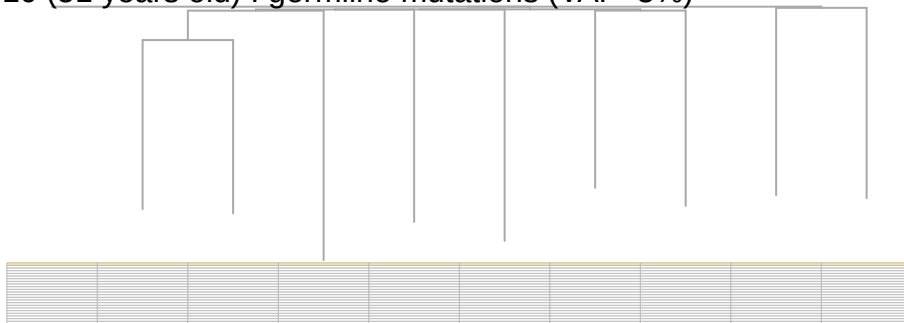

Figure 1 is a 10x10 grid of small plots. Each plot has 'S' (Number of species) on the y-axis and 'N' (Number of individuals) on the x-axis. The taxa are listed on the left and top of the grid. The plots show different patterns of species accumulation, with some taxa showing a rapid increase in species number with a small number of individuals, and others showing a more gradual increase.
